

WE ARE GOING PINK TO SUPPORT BREAST CANCER AWARENESS MONTH

INTRODUCING PINK SAFETY CAPS - SAFETY WITH A CAUSE!

SUPPORTING

Breast Cancer Foundation NZ

Breast cancer is the leading cancer among women, with 9 Kiwi women being diagnosed every day. That's over 3,500 women diagnosed across the country in a year, with 25 men affected as well. This statistic signifies the importance of raising awareness, early detection, and providing comprehensive support systems for those impacted by this deadly disease.

This October, Geofabrics New Zealand will be going pink in support of Breast Cancer Awareness month. We're helping raise funds for the foundation by selling Pink Construction Safety Caps for steel Y-posts. For each bag of Pink Safety Caps sold, Geofabrics will be donating \$10 to the Breast Cancer Foundation. Each bag contains 100 safety caps.

Together, we're making a difference in the lives of those battling breast cancer. The money raised through this initiative will play a pivotal role in providing essential breast cancer care. Our contribution will support vital hospital equipment, help fund ground-breaking research, educate people about breast health, and provide free support services for breast cancer patients and their families.

Your support can help make zero deaths from breast cancer a reality. Contact us today to purchase a bag of pink safety caps or visit our website for more information on how you can contribute to the Breast Cancer Foundation NZ.

WE ARE DONATING \$10/PER BAG OF PINK SAFETY CAPS SOLD

Breast cancer is the leading cause of death for Kiwi women under 65

We still lose more than

650

Kiwi women

a year to breast cancer
